

# TR100 Production Package

Produced exclusively by **EDM Tech Center Inc.**

The TR100 production package allows the user to run up to .500" electrodes in the TR100 to remove larger taps or drills in 1 pass. The kit also allows flushing to be directed down the inside of hollow tubes or directly down the outside of solid rods. This makes flushing set ups with the machine much faster and easier. Kit is connected to a water source using a standard garden hose thread!

## Large Bore Kit

**TR100-LBK: \$450.00**

Includes:

.500" Adaptor + 2 Electrodes [Type a quote from the document or the summary of an interesting point. You can position the text box anywhere in the document. Use the Drawing Tools tab to change the formatting of the pull quote text box.]

**Collets 1.5 - 6.0mm electrodes: \$120.00 ea.**

\*Allows flushing to be directed down the inside of hollow tubes or directly down the outside of the electrode.
